

**Saguaro National Park  
Centennial Saguaro Survey – Plot 41C  
November 13, 2015  
Saguaro Resource Staff**

Saguaro Resource staff gained surveying experience when they collected data from plot 41C, which was established in 1941! The columns in the graph below indicate how many saguaros were counted. The columns show a size range, from smallest to largest. The light blue columns represent the saguaros Resource staff monitored. Comparing past survey data, there is a substantial increase in plot 41C! Although the current saguaro population is not as high as the original population from 1941, the graph shows that 2015 has the second highest saguaro population in the past 70 years.

## Plot #41C
